

Health and Safety Management

Effective health and safety management -
everything you need to know!

Course Overview

Safety management is one of those areas that we often neglect until a situation arises where we have little or no choice but to take action. It's a key business consideration that every business has a legal obligation to manage. Our three-day programme covers the main knowledge, skills and tools required for compliance - and it's accredited by the Chartered Institute of Environmental Health (CIEH).

Why this Course?

Health and safety has become significantly more than simply a 'nice to have' or a moral obligation to your staff. This course offers the knowledge and understanding to take appropriate action to develop and promote a safe and healthy workplace by creating, implementing and managing a simple framework that will ensure that your business is fully compliant with current legislation.

Who is it Aimed at?

This is an essential qualification for anyone wishing to make sure that their business is able to identify and control its health and safety risks, reduce potential for accidents, aid legislative compliance and, above all, improve overall business activity. If you are simply unsure as to how 'compliant' your business currently is, or what you can do - give us a call, as we'll be able to help you!

What will I Learn?

The qualification will enable successful candidates to understand and put into practice the following: their own health and safety management systems, create a health and safety culture throughout, how to identify and minimise workplace and equipment hazards. It also encompasses COSHH, current legislation and risk assessment principles and practise.

Why is this Program so Good ?

Let's face it - it's a vitally important subject. Our programme is delivered by one of the top UK trainers who ensures that all our delegates fully understand and are able to absorb the content and become knowledgeable, confident and competent only 3 days. You'll also attain CIEH Level 3 certification. Simple!
